

WORLD LEADER IN
FIRE SUPPRESSION TECHNOLOGY

Pre-engineered Fire Suppression System NFG & NFD Series

SB-004-REV-A

Fire-Hawk NFG & NFD Fire Suppression Systems are pre-engineered and designed to protect enclosed compartments.

All NFG & NFD systems operate automatically through heat activation. Discharge will occur when the sensor valve temperature rises to the system activation point as shown on the label attached to each unit. System with a manual ("M") designation contain a manual capability feature. This feature provides the operator with the option of pulling a discharge cable which activates the fire system.

Fire-Hawk NFG & NFD Fire Suppression Systems are designed to induce minimum atmospheric concentration of 5.85% within the protected compartment.

The Fire-Hawk NFG & NFD series cylinder assemblies are equipped with a factory installed pressure switch which is intended for cylinder pressure monitoring and may be used for relays, alarm bells and strobes.

Product features

- Pre-engineered to protect a specific volume of enclosed space
- Automatically discharged through heat activation
- System supervisory pressure switch
- Comes with safety pin to arm/disarm manual cable release during inspection/maintenance
- Equipped with bi-directional cable release bracket for ease of install from either side of cylinder

FK-5-1-12 Agent

- People safe at design concentration
- Environmentally responsible (no ozone depletion + GWP (global warming potential) of less than 1)
- Globally accepted
- Not damaging to equipment and machinery
- No clean-up after discharge

System specifications

- Protects spaces up to 1800 ft³ (51 m³)
 - Available in increments of 25 ft³ (0.7 m³)
- Activation temp:
 - NFG 25-75 | 200-250°F (93-121°C)
 - NFG 76-100 | 175-225°F (79-107°C)
 - NFD 101-1800 | 175-225°F (79-107°C)
- NFD models are refillable
- NFG models are non-refillable
- Operating temperature range: 20°F to 130°F (-7°C to 55°C)

Applications include

- Clean Rooms
- Server rooms
- Electric Cabinets
- Industrial Processes
- Manufacturing
- Power Generation
- Records Storage

Pre-engineered Fire Suppression System

NFG & NFD Series

Selecting the proper system

- Determine the volume of the enclosure in cubic feet or cubic meters: measure Length x Width x Height (LxWxH) taking into consideration false ceilings and floor spaces
- Select an automatic only ("A") or manual/automatic ("M") model from the chart that meets or exceeds the calculated volume of the protected enclosure

What's included?

- Fire Suppression System
- System Mounting Bracket
- Suppression System Indicator Light
- System Installation & Instruction Manual

Accessory items to consider

- Manual Discharge Cable
- Alarm Bell
- Horn Strobe
